DATA SHEET. Model: GLA-250-2.

Self-contained emergency luminaire with nonmaintained functioning of the G Basic Led Autotest Series.

Description

Self-contained emergency luminaire with Autotest function for surface mounting, recessed mounting through spring kit, flush mounting through flushing frame or watertight mounting through watertight housing. Illumination through LED strip without internal diffuser.

Photometric curve

Modern and sharp-edged design with transparent, soft opal (-8%) or strong opal (-30%) diffuser.

Technical characteristics

Lamp in emergency	5 x LED White 5,700 K	Cd/Klm
Lamp in maintained	N/A	
Flux in emergency	250 lm	XX XX XX
Flux in maintained	N/A	
Charge indicator LED	1 x LED green	NXXXXXX
Fault indicator LED	1 x LED red	$ / \times \times \vee + / \times \times \vee $
Autonomy	2 h	
Supply voltage	230 Vac - 50 Hz	
Operation temperature	0 ÷ 40°C	
Mains power	2.7 W	
Battery	Ni-Cd (HT) 3.6 V – 1.5 Ah	H XX/IIXX / H
Remote controllable	Yes (TL-300)	$ X \times X $
Protection rating	IP44 - IK04	X X Hat X N
Electrical insulation	Class II	
Applicable legislation	CE marking (93/68/CEE):	X Z Z Z Z Z Z Z
-	2014/35/EU	X V 1325 V X
	2014/30/EU	— 0-180 — 45-225 — 90-270 — 135-315
	2011/65/EU

Dimensions

Surface mounting

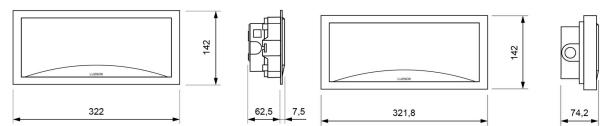

70

Recessed mounting (cut: 274 x 98 mm)

Flush mounting (cut: 298 x 124 mm)

Watertight mounting

Possibility of adding coloured ambient light

Unique features in the market due to the possibility of adding three LEDs of the desired color in the lower part of the luminaire, highlighting its attractive curve.

Autotest function

◊ Each emergency luminaire checks constantly the battery status and the electronics in the presence of mains power and performs automatically two types of different tests:

test	verification	duration	frequency
Functional	lamp, battery and electronics	6 min	3 months
Autonomy	lamp, battery, electronics and autonomy	1, 2 or 3 h (autonomy in emergency)	12 months

In case of failure, this is indicated on the emergency luminaire by a red LED, whether the luminaire is connected to mains or in emergency mode. After solving the fault, the reset button must be pressed during 3 seconds to inform the luminaire that it has been restored.

Possible signals:

☀ —	1 flash 2 flashes 3 flashes	Battery failure
00000	Flashing and lamp off Flashing and lamp on On permanently and lamp off	Performing any of the tests
